

# Program Directory

The online program directory lists programs and resources that encourage girls to pursue careers in science, technology, engineering, and mathematics (STEM). The purpose of the directory is to help organizations and individuals network, share resources, find programs, and collaborate on STEM-related projects for girls.

#### The directory contains:

- ▶ Program descriptions with Web site links
- ▶ Program resources available
- ▶ Program needs
- ▶ Potential collaboration opportunities

#### With the online program directory you can:

- ▶ Search for programs using various criteria
- ▶ Enter a program for inclusion in the directory
- ▶ Sign up for the e-newsletter listserv
- ▶ Find volunteer opportunities

## Advancing the Agenda in Gender Equity for Science, Technology, Engineering, and Mathematics.

Collaboration, as an interactive process, enables professionals across projects and communities to generate and carry out creative solutions and strategies that maximize benefit beyond that which one project or community could accomplish. The NGCP model includes a number of strategic activities that provide value and incentives to encourage organizations and individuals to work together and to use the leverage of a network or collaboration of individual girl-serving STEM programs to create the tipping point for gender equity in STEM.

SciGirls

SciGirls is produced for PBS by **tpt** National Productions and is made possible by the National Science Foundation. Additional support by ExxonMobil.

Partially funded by a grant from the National Science Foundation, GSE/EXT: National Girls Collaborative Project: Advancing the Agenda in Gender Equity for Science, Technology, Engineering, and Mathematics, Grant No. HRD-0631789.
